DOWNLOAD

AwiView 2.0.xxxx for Windows

Option: AwiView on USB

awiview_win32_2.0.1018   File folder
- Open
- **Explore**
- Cut
- Copy
- Delete
- Properties

- Refresh
- Paste
- Paste shortcut
Open the program with ▦ awiview2 > select language > open program again with > ▦ awiview2
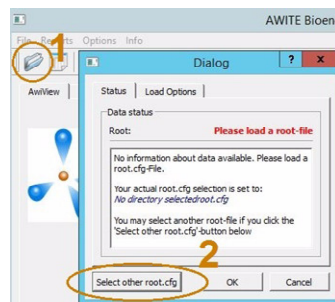

LOAD DATA

Download data <u>directly</u> from the device to a USB stick and then save it on the PC

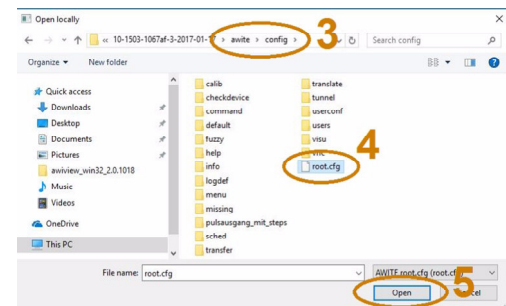

USB-Stick

Optional: Transfer data directly from the device to the PC via a network connection (more on this in the detailed operating instructions)

The file "root.cfg" must be selected as archive in AwiView

In the directory "config" of the previously saved files, select "root" as archive

DATA DISPLAY

The loaded data can now be used to generate reports, display events or errors and show values in tables or graphs. The "Ctrl key" can be used for multiple selections.
(further detailed information about all functions of AwiView can be found in the detailed operating instructions)
